PROFESSIONAL SUMMARY

Full Stack Web Developer (ASP.NET Core & React) with production experience building scalable RESTful APIs and modern frontend architectures. Focused on delivering high-performance, secure solutions and optimizing data-driven workflows for platforms with 1,200+ active users.

TECHNICAL SKILLS

- **Back End Development:** ASP.NET Core, C#, Entity Framework Core, RESTful API, LINQ, ASP.NET Identity, JWT, OAuth.
- **Front End Development:** React.js, **Angular (v16–20)**, **TypeScript**, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS.
- **Database & Tools:** SQL Server, Database Design, Query Optimization, Git, GitHub, Agile Development, Postman.
- **Core Competencies:** Technical Communication, Agile Collaboration, System Architecture, Performance Tuning.

WORK EXPERIENCE

Full Stack .NET Developer | ZenTr1x Crew | Amman, Jordan

May 2024 – Present

- **Architected and developed** scalable **Back End** APIs for the Zentrix Academy Platform, supporting **1,200+ active users** and reducing server response latency by **30%** through optimized data integration and clean code architecture.
- **Spearheaded the development of 15+ reusable UI components** in **Angular**, which accelerated front-end development cycles by **20%** and improved UI consistency across Admin, Instructor, and Student dashboards.
- **Secured sensitive user data** by implementing JWT and OAuth authentication protocols, establishing a robust security framework that protected **100% of platform logins** since deployment.
- **Optimized SQL Server database schemas**, achieving a **40% reduction in query execution time** which significantly enhanced overall system scalability and user experience.
- Led 24+ Agile development cycles, delivering 8 core modules 15% ahead of schedule while collaborating with **designers and PMs** via GitHub to align technical implementation with user requirements.

Data Administrator & Receptionist | AlHuffaz Dental Clinic | Amman, Jordan

June 2023 – November 2023

- **Managed 500+ digital patient records** and billing operations with **100% accuracy** using specialized clinic management software, reducing scheduling errors by **25%**.
- **Streamlined daily reporting processes**, which enhanced administrative workflow speeds by **15%** and supported data-driven management decision-making.

TECHNICAL PROJECTS

Task Management System

- Developed a comprehensive CRUD application that **improved the user registration flow** by streamlining access control processes; the tool is now utilized by **20+ teams**, enhancing task transparency and team productivity.

Zentrix Academy Platform

- Built a full-stack educational platform for managing courses and online assessments, integrating role-based access control and high-performance REST APIs.

E-Commerce Web Application

- Implemented a full product catalog and secure Stripe API checkout integration, reducing transaction processing time for end-users.

EDUCATION

Bachelor's Degree in Computer Science | Zarqa University 2023 – 2027 (*Expected*)

CERTIFICATIONS & ACHIEVEMENTS

- **Foundational C# with Microsoft** (Microsoft & freeCodeCamp): Applied core C# concepts, including object-oriented programming and data structures, to build functional applications.
- **SQL Advanced & Angular Certificate** (HackerRank): Certified in executing complex SQL queries and developing modern single-page applications using Angular.
- **Solo vs Quad CTF Competition (2024)**: Secured **Top #7 ranking** by identifying and mitigating advanced cybersecurity vulnerabilities involving cryptography under strict time limits.
- **Build with AI Hackathon (GDG Amman)**: Collaborated in a rapid development environment to engineer an AI-integrated solution, successfully delivering a functional prototype within the competition deadline.
